Reference letter for EDS website.
Attention Eddie Cunningham.

G'day Eddie.

Just a quick note to say thanks for the service delivered for the recent project at the power station. We were impressed with your attention to detail within the drawings. The pipe-work, compressors, driers and related connections made the job very clear to all concerned. This was no easy task. The accuracy and flare with colour and presentation obviously helped to secure the contract for us. You also showed up quickly and modified the drawings mid-project, which was essential for works to continue. The 'as built' drawings at the conclusion of works with the P&ID number references really delivered a level of sophistication and polish to the project.

We look forward to working with you again soon.

Regards,

Glen Mclean
Branch Manager
